

# Cardiologs ShareSpace

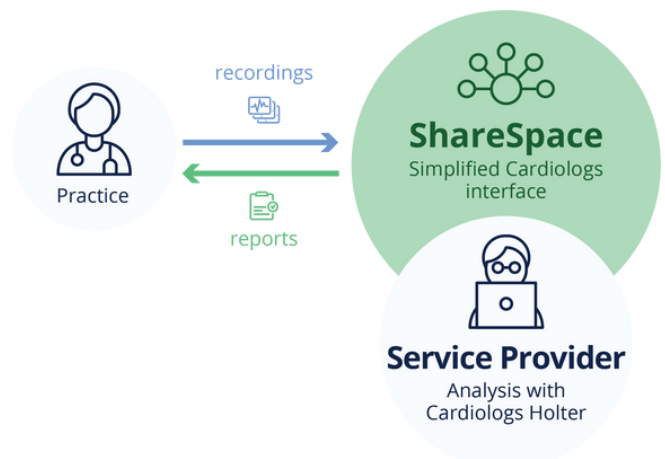

*Free yourself from complex IT infrastructures*

Getting Holter recordings and transferring reports to practices in a secured way requires dedicated infrastructures that may be challenging to put in place and maintain.

Rely on Cardiologs ShareSpace, an additional feature of the Cardiologs Holter platform for secured cloud-based transfer of data and get rid of the burden of local infrastructures.

Build partnerships while making the most from Cardiologs Holter vendor-neutral and AI-assisted analysis to improve your operational efficiency.

*Practices can easily upload recordings that are automatically added to your worklist for analysis. Reports you generate are then accessible in their Cardiologs account.*

**With Cardiologs ShareSpace, get a unique cloud-based solution for secured data sharing and free yourself from the burden of local infrastructures.**

## Secured data sharing

- GDPR and HiPAA compliant
- Data hosting onto a certified Health Data Host (HDS)
- Pseudonymization, firewalls and encryption to secure personal data at rest and for transfer

## No local infrastructure

- No need to worry about building and maintaining IT infrastructures to share and host data. We take care of everything in the cloud!

## Fits multiple recorders

- Improved productivity with a unique worklist and an AI-assisted analysis that fits multiple devices<sup>2</sup>
- Scalable services that can integrate new devices

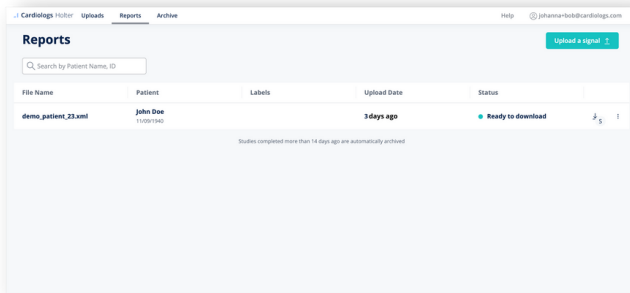

## Why Cardiologs ShareSpace ?

Using our cloud-based solution, it is possible to access the platform from any web browser. It means there is no need for local infrastructure and software for you and your clients. You can **on-board new clients sending them a simple invitation** to activate their account.

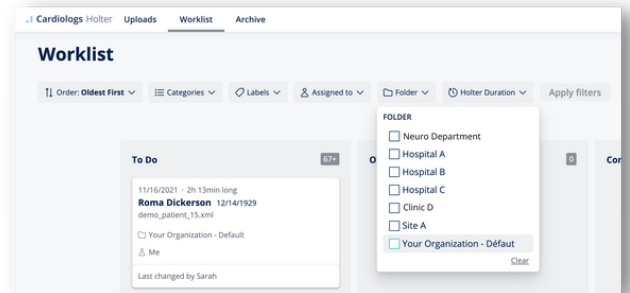

Securing your data is a top priority at Cardiologs. Our security policy as well as technical and organizational measures for processing of personal data will bring you **peace of mind**.

**Take advantage of the benefits of the Cardiologs Holter platform :**

- **Save up to 78% in time needed for Holter analysis and reporting** using our medical-grade AI<sup>1</sup>
- **Our vendor-neutral solution lets you integrate new devices**, thus expanding your activity freely with no additional software needed<sup>2</sup>

Using ShareSpace simplified interface, your clients can directly upload recordings and download reports you generated

From your Cardiologs Holter interface, identify and filter your clients' recordings
